Nature's Answer to a Modern Problem

"From the Earth.
For the Earth."

Every day, millions of amenity kits end up in landfill.

Across hotels, airlines, and resorts worldwide, single-use amenity kits are provided to guests by the millions — most in plastic packaging that takes hundreds of years to break down.

On a single flight, 100 amenity kits may be loaded. 50–60% will go unused. But every single one — used or not — is discarded at the end of the flight. That's plastic waste, every day, on every route.

It's not just airlines. Hotels, resorts, spas, and corporate travel all face the same problem. The hospitality industry generates an estimated 289,700 tonnes of single-use plastic waste annually.

High Quality Amenity Products

Were always available.
But no one had solved The packaging.
until now.

There is always a solution from nature itself to solve every problem, without harming the Earth.

From Nature

Every material we use is plant-based or naturally derived — bamboo, cornstarch, coconut.

Back to Nature

Our products biodegrade completely. No landfill. No pollution. No trace left behind.

No Compromise

Sustainable doesn't mean inferior. Our products match the quality of any premium brand.

For Every Industry

Airlines, hotels, resorts, spas, corporates — anyone generating amenity waste is our partner.

99% biodegradable. 100% premium.

When a Brand X kit is discarded — used or unused — 99% of it dissolves back into the earth naturally. No landfill. No plastic. No harm.

Why 99% and not 100%?

The shaving gel requires an inner aluminium foil lining for safety and preservation — this accounts for the remaining 1%. Every other component is fully biodegradable.

What this means for your operation

- Zero plastic guilt — whether kits are used or wasted
- Meet your sustainability and ESG targets with ease
- Offer passengers a premium, conscious experience
- Differentiate your brand as a leader in green aviation

The packaging was the problem. We solved it.

Our tubes and wrappers are made from 100% biodegradable cornstarch film. They look premium, feel premium — and completely dissolve in nature after disposal.

- Material: Cornstarch-based biodegradable film
- Outer kit box: Recycled brown kraft cardboard
- No plastic. No synthetic polymers. No microplastics.
- Fully compostable — returns to soil naturally
- Custom branded for your airline / property

All packaging is sourced and quality-certified from verified eco-material suppliers

Everything your passenger needs. Nothing the Earth doesn't.

The complete kit — packed in recycled kraft cardboard

Personal Care **Shampoo**

Premium ingredients. Biodegradable cornstarch tube.

Personal Care **Shower Gel**

Premium ingredients. Biodegradable cornstarch tube.

Dental Kit **Toothbrush + Paste**

Bamboo or cornstarch handle — client's choice.
